

Impacts

BD4QoL intends to significantly impact on the quality of life of people after Head and Neck Cancer through the introduction in the care workflow of innovative e-health solutions supported by large amounts of integrated unconventional and healthcare data, collected by mobile technologies, and Artificial Intelligence algorithms. Our breakthrough approach for the design of clinical trials will open new pathways for clinical research and for new cancer follow-up guidelines that integrate patients, cancer reference physicians, GPs and medical specialists.

Improve head and neck cancer patients quality of life
